

MEDIA RELEASE – 5 SEPTEMBER 2023

26TH EDITION OF MINE ENTRA SET FOR NOVEMBER

- The ZITF Company is thrilled to announce the highly anticipated dates for its upcoming exhibition, Mine Entra. The premier mining, engineering, and transport exhibition in Zimbabwe will be held under the theme "**Accelerating Economic Transformation through Mineral Beneficiation,**" from **1 to 3 November 2023** at the Zimbabwe International Exhibition Centre in Bulawayo.
- Organised in partnership with the Ministry of Mines & Mining Development and the Chamber of Mines of Zimbabwe, Mine Entra is the most reputable expo of its kind in Zimbabwe and one of the largest in the Southern African region. Having been in existence for a successful 25 non-consecutive editions, the expo has built a solid reputation for providing an integral business and networking platform. Known for its ability to bring together the 'who is who' of the relevant sectors, Mine Entra provides a pivotal platform for high-level conversations towards shaping and improving the mining landscape in Zimbabwe.
- Mine Entra has been at the forefront of showcasing the latest advancements in the mining industry, fostering partnerships, and driving economic growth. The exhibition provides a platform for industry professionals, stakeholders, and investors to explore innovative solutions, share knowledge, and engage in meaningful discourse on the critical topic of mineral beneficiation.

- For the past five years, the Zimbabwe mining industry has been heavily focused on attaining a stable and sustainable US\$ 12 billion in output by 2023, a feat that called for the deliberate contribution and cooperation by all relevant stakeholders to meet this target. This fact, together with the key local and international mining industry trends namely, technology transformation, the energy transition, and critical minerals has inspired the Mine Entra 2023 theme.
- The theme calls on industry stakeholders to embrace technology and innovation in their mining processes, bearing in mind the importance of mineral beneficiation for Zimbabwe as a developing country. It also highlights how innovative mineral beneficiation has the potential to transform the economy through job creation, higher mining industry profitability as well and an increase in direct foreign investment, all in line with the National Development Strategy (NDS1), which is integral in the pursuit of the attainment of Vision 2030.
- The exhibition will maintain the usual 3-day format with supporting concurrent events. Attendees can look forward to a comprehensive program that includes expert-led conferences, and networking opportunities designed to foster collaboration and knowledge sharing. Mine Entra 2023 will bring together leading minds, government officials, industry experts, and investors to explore the latest trends, challenges, and opportunities in the mining and mineral beneficiation sector.
- Concurrent events will include the Mine Entra Conference and Official Opening as well as the Mine Entra Exhibitors Cocktail on the second day of the exhibition. The third and final day will feature the Mine Entra Charity Golf Challenge and the Small Scale and Artisanal Miners Conference.

- Mine Entra 2023 promises to be a tremendous exhibition given the high volume of local and international inquiries that have been received already. Registration is ongoing and all stakeholders, both local and international, are encouraged to take part and contribute to the advancement of the mining sector.
